

AITOR GALLARDO MUÑOZ

FRONT END DEVELOPER

WORK EXPERIENCE

Front End Developer

2SHAPES TECHNOLOGIES SLU | December 2017 - December 2019

Development since the early days of the product, the main focus of the company was a SaaS for the jewelry industry divided into different tools:

- 'CAD' for 3D jewelry models.
- Inventory manager for products, materials...
- 'POS' with management of customers, payments, invoices...
- Customized e-commerce creation and management tool.
- Manager for the centralization and tracking of product manufacturing.

My role at the company was mainly developing and maintaining the former tools using Typescript and Angular. Other libraries very present in the development were 'RxJs' for asynchrony and event management and 'BabylonJs' for 3D rendering.

Among the different activities I performed in the company I would highlight:

- Participate in the design and architecture of the project.
- Collaborate in the implementation challenges presented by the software.
- Maintenance of the application and its different bugs.
- Implement components to standardize and speed up the development.
- Receive and support my colleagues in the different daily challenges.
- Discuss and propose ideas and improvements with the team.
